Projects

Personal Website JS, React, SCSS, Bootstrap, SVG, LAMP Stack
Built and self-hosted my personal website, *katieboedges.com*.

Cyber Security Countdown JS, React, Redux, CSS, Fetch API
Built application based on Sketch design within proposed timeframe for volunteer project. Implemented Fetch API to retrieve passwords securely.

HealCode MINDBODY Widget PHP, CSS
Successfully designed, built, and launched WordPress PHP plugin for HealCode. The product significantly decreased support workload and increased functionality. It currently has over 8,000 active installs.

Experience

MINDBODY Inc. | Software Engineer I – FEE | Austin, TX March 2019 – Present

- Resolved frontend Vue, JS, and CSS bugs (often in embedded Ruby files)
- Wrote automated tests with RSpec, Capybara, and Jest
- Added and adjusted jQuery code to handle logic for new features
- Collaborated with team to introduce React to codebase

MINDBODY Inc. | QA Technician I | Austin, TX April 2018 – March 2019

- Modified components in React-based design system codebase
- Fixed visual bugs in React, ASP, and C# codebases using CSS and JavaScript
- Worked with several testing tools, including SQLPro, Postman, VSTS, and Enzyme

MINDBODY Inc. | Branded Product Coordinator | Austin, TX Sept 2016 – April 2018

- Designed, built, and managed 5 demo websites on various platforms (WordPress, Squarespace, Weebly, Wix) and 3 demo Facebook pages
- Resolved CSS conflicts and restyled products for escalated clients
- Installed custom HTML elements and JS onto over 30 CMSes/website builders

Education

React Nanodegree | Udacity July 2018
Bachelor of Science in Physics | Austin Peay State University May 2012
